

Job Description: SQL Developer

Responsibilities:

- Develop, test, and deploy SQL scripts, stored procedures, and functions.
- Design and maintain data models and databases.
- Write complex SQL queries for data extraction and analysis.
- Optimize queries for performance and scalability.
- Collaborate with developers and business analysts to design database solutions.
- Ensure data integrity and security.
- Monitor database performance and implement improvements.
- Provide support for database-related issues.

Requirements:

- Bachelor's degree in Computer Science, IT, or related field.
- Proven experience as an SQL Developer or similar role.
- Excellent knowledge of SQL and T-SQL.
- Experience with SQL Server, MySQL, or Oracle databases.
- Understanding of database design and development.
- Familiarity with ETL tools and data warehousing concepts is a plus.
- Strong problem-solving and analytical skills.
- Good communication and teamwork skills.
